DESCRIPTORS: *Plasma physics, Conductivity, *Elec-
tric discharges, High frequency, Electric currents,
Direct current, Electrons, Kinetic theory, Gas
discharges.

An expression is sought for the complex conductivity
of the plasma of an arc discharge supported by a strong
d-c current for the case in which a very weak high-
frequency current that does not affect the condition of
the plasma passes through it. The agreement between
the results found and previous notions is satisfactory.

A complexometric method has been worked out for the
determination of mercury in tablets with mercuric
chloride, mercuric oxide, ointment with yellow mer-
curic oxide, mercuri-salicylic acid anhydride and some
diuretics containing mercury, such as Novuril inje-
ctions. The principle of this method is based on the

Comparison of the results obtained with the enteric
coatings for dragees which were investigated in this
study reveals that the copolymer st-ma 37 and 4%
layers did not suffice because of insufficient resistance
to the corrosive influence of the gastric environment.
